...commenting on the progress of Stockton-as-autocross.

Since I don't /use/ FB I had not seen this. But it isn't someone who is new to the sport and the area!

<https://www.captiongenerator.com/933242/Stockton-Autocross-Site> :lol: :lol:

p.s. if you aren't into memes, this "rant" video has been re-used for many, many satirical scripts on different subjects. You just have to have too much time on your hands. ;)

I love this.

But that ended too soon. Would have been perfect for one of the generals to inform Hitler that an Evo would break down.

"And a big wing that does nothing" .. :lol:

Too funny!

First time seeing this. hint, hint, we ran a couple of rallycrosses a few years ago. I asked if the infield could be used for RallyCross, when the fairgrounds was hoping to turn the infield of the horse track into soccer fields. Then they started doing motocross races and currently sprint cars. I still have a shifter kart and would love to do autox again with it, but I've gotten used to doing rallycross events with each run at least 1:30 and we used to do courses that take 3 minutes, yes 3 MINUTES per run.

Brent
