Hey Dave,

Just got to wondering why the forum truncates a post if it's a long one. Do you have the ability to remove this feature, or set the threshold higher? It seems a bit intrusive when a good discussion is occurring, requiring extra clicks to show the whole post.

Haha, yeah. I just noticed that. I've seen it before, but I think it showed up more today than in the whole rest of the time that the forum has been in existence. I'll check it out and change it if easily possible.

Thanks!

There is no feature that I can tweak to make the posts not break into two parts, unfortunately. It seems this is a product of the way they did the database schema. There is a new release coming fairly soon. I have been keeping an eye on the progress. Once it goes g-a, I'll probably install the new version on my sandbox server and see how it looks. Maybe there will be an easy way to change that setting on the new version.
